

Art No. BT0021

Bluetooth Audio Receiver

For iDevice Dock Speaker

This receiver converts an ordinary i-Device docking speaker into a wireless speaker system. You can have your i-Device, smart phone or tablet close to you while playing music wirelessly and also allow you to skip tracks, pause and change volume. It works with most other portable devices with Bluetooth connectivity.

Specifications:

- No batteries or external power required – simply plug into a powered Apple speaker dock
- Bluetooth mobile devices must support A2DP or AVRCP profiles – They can include iPhones, iPods, iPads, Laptops, PCs and various other mobile phones and devices.
- No software or drivers and no PC/MAC connection required
- Supports play/pause/skip and volume functions from your phone via A2DP connection
